SUMMARY

Full-stack web developer in Lahore, building websites, web apps and AI-powered products for small businesses and agencies. Turns Figma designs into fast, responsive sites in Webflow, Next.js and Astro, with custom interactions in GSAP and a structure your team can edit. Delivered eight pages in three days and a four-page application flow in two days. Founder of BuildoraIO, an AI workflow tool built solo in about two weeks and used on live client projects. Every project gets responsive, speed and browser checks before launch. Works at Jaryah Studios and takes freelance projects directly.

EXPERIENCE

Jul 2026 — Present

Web Developer

Jaryah Studios / Go Funnels, Remote

- Worked across multiple client Webflow projects, building new pages, fixing existing websites, and maintaining CMS-heavy sites.
- Updated and fixed 100+ NSF blog posts, including responsive tables, broken links, headings, CMS formatting, and content structure issues.
- Built and improved pages for projects like EPIC Retreat and CAGE International, including tabs, sticky scroll interactions, CMS updates, and responsive fixes.
- Used Webflow CMS, Client-First, Finsweet Attributes, GSAP, Swiper.js, and custom code depending on project requirements.
- Handled website QA, responsive testing, performance improvements, SEO fixes, and tracking setup with GTM, GA4, and Microsoft Clarity.

Feb 2026 — Jun 2026

Webflow Developer

Interfacelab, Lahore (Remote)

Joined as a Webflow Developer Intern in February 2026 and moved into a full-time Webflow Developer role in May 2026.

Built responsive Webflow websites using Finsweet Client-First, converted Figma designs into production-ready pages, structured CMS content, and used custom code and interactions when needed.

Nov 2024 — Apr 2025

Barista

WOFL, Dubai, United Arab Emirates

I worked as a barista in a busy environment, serving over 100+ customers daily, including Europeans, Asians, and tourists from all over the world. I operated La Marzocco espresso machines and Sanremo grinders to make everything from hot latte art to cold brews, iced V60, and Affogatos. Working in a diverse 3 to 4-member team with colleagues from Nepal, Africa, and Pakistan, I handled cash, took orders, and kept the cafe clean. I made sure every drink met high standards while maintaining a friendly vibe during heavy rushes.

Nov 2023 — Oct 2024

Assistant Supervisor

NU Projects, Dubai, United Arab Emirates

I managed a site crew of 20+ laborers, including technicians and helpers, on residential villa projects. My daily shift started with taking attendance, giving safety tools, and inspecting all site equipment and wire extensions. I did not just supervise; I also did hard labor by hand, including unloading materials and chipping with a jackhammer in the 50+ degree UAE summer heat. Additionally, I spent time with villa owners to inspect newly arrived materials, ensuring everything ordered was correct and up to standard while keeping the project moving on time.
